1. Startup / Idea Details

Startup / Project Name: FixO (FixO - Facility Operations System by Invarsoft)

One-line Description: A multi-tenant enterprise facility operations SaaS platform for real-time maintenance dispatch, SLA tracking, and OTP-verified resolution across educational campuses, hospitals, and commercial real estate.

Sector / Domain: Enterprise SaaS / B2B PropTech / Facility Operations & Management

Date of Registration: 02 / 09 / 2026

Problem Statement: Large institutions and commercial complexes—including universities, hospitals, IT parks, and residential towers—suffer from fragmented manual maintenance tracking. This leads to zero visibility for administrators, un-enforced SLA deadlines, delayed technician dispatches, and unverified work closures.

Proposed Solution / Product: FixO is a scalable multi-tenant Web & Mobile SaaS portal. It offers domain-restricted multi-role authentication, automated trade-skill technician dispatching, a 6-step visual service lifecycle tracker, mandatory OTP resolution verification before ticket closure, and an executive SLA escalation engine adaptable for universities, healthcare facilities, and corporate offices.

Core Technology Used: Next.js 15 (App Router), React 19, TypeScript, Tailwind CSS, FastAPI / Node.js REST APIs, PostgreSQL Multi-tenant Architecture, JWT Authentication & OTP Engine.
